About Us

Umlan Global Ventures was founded to close a gap many Nigerian businesses and public institutions face: finding one dependable partner who can deliver across construction, procurement, energy, and technology — instead of juggling a different contractor for every need. From small renovation jobs to multi-service contracts, our approach stays the same: understand the brief, mobilise the right team, and deliver work that holds up long after the invoice is paid.

Mission: To deliver high-quality contracting, engineering, procurement, renewable energy, facility management, and business support services through professionalism, integrity, innovation, and customer satisfaction — while creating value for clients, employees, shareholders, and society.

Core Values

Integrity	Excellence	Professionalism	Accountability
Innovation	Customer Focus	Teamwork	Safety

Why Choose Us

- Integrated Services** — One provider for procurement, engineering, ICT, renewable energy, facilities management, and logistics.
- Quality & Compliance** — Strong focus on standards, documentation, and transparent project delivery.
- Responsive Execution** — Lean structure with trusted specialist partners enables quick mobilisation.
- Sustainability** — Emphasis on renewable energy, responsible sourcing, and environmental stewardship.
- Long-Term Relationships** — Maintenance contracts and after-sales support designed to create recurring value.
- Technology-Enabled** — Digital tools for project management, reporting, procurement tracking, and client communication.

Our Service Divisions

1. Procurement & Supply Chain

Office equipment, construction materials, medical consumables, PPE, and strategic sourcing for government and private clients.

2. Civil Engineering & Construction

Residential, commercial and institutional buildings, renovations, road rehabilitation, and interior finishing.

3. Renewable Energy & Solar

Solar PV installation, hybrid inverters, battery storage, solar street lighting, and energy audits.

4. Facility Management

Cleaning, janitorial services, building and electrical maintenance, HVAC servicing, and waste management.

5. ICT Infrastructure

Structured cabling, network installation, CCTV surveillance, access control, and data centre support.

6. Water Engineering & Environment

Borehole drilling, water treatment systems, drainage maintenance, and environmental consultancy.

7. Logistics & Project Support

Material transportation, fleet coordination, equipment mobilisation, and warehouse support.

8. Agriculture & Agribusiness

Farm input supply, agro-equipment sourcing, storage and post-harvest support, and produce off-take logistics.
